

Environmental Policy

Dear Guest

Management and staff of **An Grianan Hotel** recognise that our day to day activities have an impact on the environment. As part of our overall management we wish to continuously improve our environmental performance.

Specifically we are:

- Conserving energy
- Conserving water
- Reducing waste by re-using and recycling
- Educating, training and motivating staff to work in an environmentally responsible manner and to participate in developing new ideas and initiatives
- Communicating with our guests and providing information about local landscape biodiversity and activities with a low environmental impact in the area

As part of our ongoing environmental management we have:

- Reduced water pressure in all taps and showers
- Started to replace all lights with low energy alternatives
- Developed a waste management policy to ensure all waste is segregated into recyclable and non recyclable, to reduce waste going to landfill
- Developed a purchasing policy to ensure all supplies are sourced locally to support the local economy

As our guests we would appreciate if you could assist in our environmental performance by:

- Keeping windows closed if the heating is switched on
- Report to reception if you are unhappy with the room temperature and we will change it for you
- Turning off lights when not required
- Saving water by not using running water while brushing teeth, shaving and to report any leaks
- Requesting when towels are to be replaced by placing on the floor
- Separating waste into bins provided

We appreciate your participation in our environmental management programme and welcome any feedback.

Thank you

Walter Figini
General Manager
